Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I without traverse in Paper No. 9 is acknowledged.

Applicant is reminded to cancel claims drawn to a non-elected invention.

Claim Rejections - 35 USC § 112

1. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The invention employs wheat starch obtained from the endosperm of a wheat seed and that lacks granule protein-1 (SGP-1) and has an apparent amylose content of about 35% or more. Since the wheat starch, and subsequently the wheat seed is essential to the claimed invention it must be both known and readily available to the public or can be made or isolated without undue experimentation. If the wheat seed is not so obtainable or available, the requirements of 35 USC § 112 may be satisfied by a deposit of wheat seed that when planted will produce the plants from which the claimed starch may be obtained. Alternatively, the Applicant may satisfy the deposit requirement by depositing the parent cultivars which were used to obtain the hexaploid wheat

Art Unit: 1661

that lacks starch granule protein-1. A deposit of 2500 seeds of each of the parent varieties or the wheat variety lacking the starch granule protein-1 is considered sufficient to ensure public availability. If the deposit is made under the terms of the Budapest Treaty, then an affidavit or declaration by applicants, or a statement by an attorney of record over his or her signature and registration number, stating that the specific alfalfa line(s) has been deposited under the Budapest Treaty and that the seed will be irrevocably and without restriction or condition released to the public upon the issuance of a patent, would satisfy the deposit requirement made herein.

If the deposit has not been made under the Budapest Treaty, then in order to certify that the deposit meets the criteria set forth in 37 C.F.R. 1.801-1.809, applicants may provide assurance of compliance by an affidavit or declaration, or by a statement by an attorney of record over his or her signature and registration number, showing that

- (a) during the pendency of this application, access to the invention will be afforded to the Commissioner upon request;
- (b) all restrictions upon availability to the public will be irrevocably removed upon granting of the patent;
- © the deposit will be maintained in a public depository for a period of 30 years or 5 years after the last request or for the enforceable life of the patent, whichever is longer;
- (d) a test of the viability of the biological material at the time of deposit (see 37 CFR 1.807); and,

Art Unit: 1661

(e) the deposit will be replaced if it should ever become inviable.

Additionally, applicant is advised that the specification must be amended to reflect the accession number for the deposit, the date of the deposit, a description of the deposited biological material, and the name and address of the depository in accordance with 37 CFR 1.809.

Claims 1-5 are deemed free of the prior art, given the failure of the prior art to teach or suggest a wheat starch having an amylose content greater than 35%. Wheat starch differs from other starches according to the proteins that are tightly bound to the starch (Yamamori et al, 2000, page 21, 23, 27, 28, Fig. 2, Fig 4; Baba et al, 1993, page 565, 570; Abel et al, 1996, pages 987, 988; Cao et al, page 214; U.S. patent 6,103,893, column 2, lines 54-67, column 3, lines 1-34; U.S. patent 5,977,454, column 2, lines 30-67; U.S. patent 4,587,332, column 7, lines 26-28, and all of Takaoka et al).

No claim is allowed.
